

REACH – Information

### SVHC- Materials

Dear Customer,

Acc. to article 33 of the EU Regulation 1907/2006 (REACH) we are required to survey our products if they contain SVHC substances and to inform you in case of mass concentration of more than 0.1 % w/w.

In this case we mostly depend on the information of our suppliers. As soon as we learn that our base materials contain SVHC substances we subsequently control our products. If there is, based on the control, the need to inform you, you will receive a corresponding information letter for the material numbers affected stating the necessary property data. If you have not yet received any letter you can expect that there is no SVHC substances in mass concentration of more than 0.1 % w/w in the printed circuit boards delivered to you.

Our contact person for REACH in our company is:

Mr. Ralph Junk (Environment, phone. no. +49 6423/81-349, e-mail: [r.junk@se-pcb.de](mailto:r.junk@se-pcb.de)).

Schoeller Electronics Systems GmbH
